GDA

Gesamtverband der Aluminiumindustrie e. V. (GDA) is the German association of aluminium companies that produce raw aluminium or aluminium products, also in combination with other materials. As a trade association it represents the interests of an efficient aluminium industry in Germany.

ALUMINIUM 2018

The conference will be held alongside ALUMINIUM 12th World Trade Fair in Düsseldorf. The trade fair unites producers, processors, technology suppliers and consumers along the entire value chain - i. e. from raw materials through to semi-finished and finished products. ALUMINIUM is the leading B2B platform in the world for the aluminium industry and its main applications.

ALUMINIUM – Material
for the Future

www.aluminium-conference.de

In conjunction with
ALUMINIUM 2018

→ Call for Papers

Aluminium is a metal that has found its way into many areas of everyday life. You find it as castings, sheets, profiles and forgings in transport, building and construction, mechanical engineering and precision mechanics, electrical engineering, chemical engineering and food industry, kitchen, household ware and metal goods. In many cases aluminium-specific joining or surface technologies are applied to enable the light metal to fulfill special requirements.

Aluminium is a perfect recycling material. Modern sorting, pre-treatment and remelting technologies are the prerequisite to ensure a closed aluminium loop in order to contribute to the raw material supply and a resource efficient society of today and tomorrow.

At the ALUMINIUM 2018 Conference with its motto 'Aluminium – Material for the Future', the various applications of aluminium currently used be presented together with possible further developments that will make products in the future even lighter, nicer and more resource efficient.

Together with representatives from the different sections of the industry, manufacturers of semi-finished products, refiners, remelters and sub-suppliers, the latest innovative and future-looking solutions will be presented and discussed.

→ Topics

- **Aluminium Markets**
- **Additive Manufacturing**
- **Automotive**
- **Plant and Equipment**
- **Recycling Technologies**
- **Surface**

In addition to a short abstract, proposals for papers to be presented should include the full name and address of the author(s) (name, title, address, phone and email). They should be no more than one DIN A4 page long and in English. The final paper should not be more than 30 pages long including text and transparencies. Tables and photos are desirable. The congress language is English. Papers and presentations should generally be written in English. For this year's Congress we will have simultaneous translation into English and German. You are therefore free to give your lecture either in English or German. Please let us know your language preference.

Please send your proposal by website or email to:
wolfgang.heidrich@aluinfo.de or
georg.grumm@aluinfo.de

Proposals that are accepted will be published in the proceedings.
