

EAC 2019: Aluminium and Mobility

"Call for Papers" for the European Aluminium Congress 2019

Düsseldorf, 12 February 2019 – On November 25 and 26, 2019 the Gesamtverband der Aluminiumindustrie e.V. (GDA), Düsseldorf, will be holding the European Aluminium Congress 2019 in Düsseldorf on the subject of "Aluminium and Mobility". Effective immediately, subject proposals and presentations can be submitted. **The closing date for the "Call for Papers" is 27 May, 2019.** The EAC 2019 is organised by the GDA within the "D-A-CH, Alliance for Aluminium" with support from the Swiss aluminium association (alu.ch), and the Austrian Federal Economic Chamber, NE metal industry trade association (WKO).

The use of aluminium in mobility applications and their solutions is one of the fastest growing market sectors. The enormous weight reduction attributable to the use of the light metal results in a positive impact on energy and resource efficiency and on the reduction of CO2 emissions in the automotive industry as well as in aerospace, shipbuilding and rail applications. Aluminium ensures high stability coupled with lightness and cost-effective and eco-friendly movement. Aluminium is therefore the material of choice in the age of mobility.

At the European Aluminium Congress 2019 with its theme 'Aluminium and Mobility', the various potential uses of aluminium will be presented together with possible further developments that will make vehicles and other means of transport of the future even lighter and more energy-efficient. Speakers and participants from OEMs, suppliers and equipment manufacturers will discuss innovative developments, new technologies as well as strategies and the outlook for the use of aluminium in future mobility applications and their solutions.

Interested companies and institutes are invited to participate in the "Call for Papers". The language of the congress is English and presentations should be submitted in English. This year's congress will be simultaneously translated into German and English. More information can be found at the congress web page: www.aluminium-congress.com
